

I want people to understand that they can still have a voice no matter who they are or what the world says about them. Now more than ever, there are so many forces that just want you to give up and be quiet. If this album can help you resist that, then that's what it's for." - **Peaches on her new album "No Lube So Rude"**

PEACHES

Iconic musician, producer, director, and performance artist, Peaches first catapulted to stardom with her “surreally funny [and] nasty” (*Rolling Stone*) 2000 debut, *The Teaches of Peaches*, which introduced the world to her sexually transgressive, fiercely assertive, and utterly captivating persona. Since then, Peaches has released four more trailblazing albums, won the prestigious Polaris Heritage Prize, collaborated with everyone from Iggy Pop and Daft Punk to Christina Aguilera and Yoko Ono, landed songs in cultural watermarks like *Lost in Translation* and *The Handmaid's Tale*, and seen her work studied at universities around the world.

In addition to her musical output, Peaches has directed over 20 videos, co-curated a photo book of her life, created a host of immersive installations and performative works, and penned the electro-rock opera *Peaches Does Herself*, which was adapted into a film shown at over 70 festivals. The subject of two acclaimed documentaries, Peaches has also played the title role in Monteverdi's *L'Orfeo* and Brecht's *The Seven Deadly Sins* and continues to perform her widely lauded one-woman show, *Peaches Christ Superstar*. Peaches released her debut score in 2026 for Dan Levy's *Big Mistakes* (Netflix).

Peaches' newest album, *No Lube So Rude*, recorded with co-producer The Squirt Deluxe, is a brash, unapologetic exploration of identity, sexuality, age, and bodily autonomy, a provocative work of emotional and sonic alchemy that balances the poetic and the profane in equal measure as it transforms all the friction and frustration of modern life into joy and transcendence.
