

/// Tonic Walter go on their biggest headlining tour in 2026 with their new album!

After the release of their debut album *It All Comes Together*, which explored themes of unity and transformation, Tonic Walter now enter a darker and more contrasting chapter with their second album *II*. The record revolves around tension, separation, and the fragile space between hope and collapse.

Atmospheric pads, organic grooves, analog synths, and raw electronic textures shape a sound that feels both intimate and expansive — melancholic yet driving, fragile yet euphoric.

This energy carries directly into Tonic Walter's live shows. Blending the emotional depth of a live band with the intensity of melodic house and techno, the duo has built a reputation for immersive and highly dynamic performances.

With over 150 million streams worldwide and sold-out headline shows across Europe in cities including London, Berlin, Paris, Munich, and Zurich, Tonic Walter have become one of the most exciting emerging live acts in electronic music. Following tours with Tycho and Fritz Kalkbrenner in 2025, the duo now embark on their biggest European headline tour to date — bringing the world of *II* to stages across Europe in 2026.
